

NDIFREKE ASUQUO

Software Developer | Full-Stack Engineering, Cloud & Financial Systems

Isle of Man | +44 7624 239154 | asuquondifreke06@gmail.com | Portfolio · GitHub · LinkedIn

PERSONAL STATEMENT

Full-stack software developer with over five years' experience across the complete development lifecycle, including REST API design, data modelling, cloud deployment and Agile/Scrum delivery. Proven track record delivering secure, production-grade systems — including a full-stack platform processing real payment transactions — with a strong focus on clean, testable, maintainable code. A fast, self-directed learner who is currently extending existing backend and cloud experience into C#, .NET and Microsoft Azure, and is keen to bring that adaptability to Nedbank Private Wealth's Technology division.

KEY SKILLS

Languages

JavaScript (ES6+), TypeScript; building working knowledge of C# and .NET

Cloud & Architecture

Building Microsoft Azure knowledge (Azure Functions, cloud deployment); hands-on production experience with AWS (S3, CloudFront) and Oracle Cloud (Certified); solid understanding of REST APIs, microservices and distributed system design from live production work

Data

SQL (PostgreSQL, MySQL), MongoDB, data modelling, query optimisation; comfortable extending this to MS SQL Server

Frontend

React.js, Next.js, HTML5, CSS3, TailwindCSS — used to build the customer-facing side of full-stack systems

Delivery & Quality

Agile/Scrum, Jira, requirements gathering & analysis, unit & functional testing (Jest, Postman, TDD), CI/CD (GitHub Actions), documentation to agreed standards

Domain Relevance

Built and shipped a live payment-processing platform (Stripe integration, secure checkout) and a system enforcing role-based access to sensitive personal data — directly relevant to financial services requirements around security and data integrity

PROFESSIONAL EXPERIENCE

Full-Stack Software Engineer Feb 2022 – Sep 2025

GOMYCODE — Lagos, Nigeria / London, UK

- Designed, built and tested a full-stack e-commerce service (Node.js, MongoDB) with secure third-party payment API integration, maintaining 99.9% operational reliability — direct experience with the transaction-integrity and reliability standards expected in banking systems.
- Gathered and analysed requirements from stakeholders and translated them into working application components and technical designs, communicating clearly with both technical and non-technical audiences.
- Set up CI/CD pipelines and version-control standards (GitHub Actions, Git), and documented processes so work could be understood, maintained and improved by the wider team.
- Migrated core application architecture to Next.js as part of a wider platform modernisation project, lifting traffic and search visibility by 30%.
- Worked both independently and collaboratively within sprint planning and development cycles, contributing to a small, cross-skilled delivery team.

Full-Stack Developer Sep 2019 – Oct 2021

I & T Software Solution — Lagos

- Built and maintained REST API endpoints, applying agreed development and security standards throughout.
- Investigated and resolved issues in existing applications, improving page-load performance by 30% and removing recurring bottlenecks.
- Worked closely with database administrators, designers and product stakeholders to model data, resolve conflicting requirements and agree practical technical solutions.
- Produced supporting documentation and automated scripts to reduce manual setup overhead for the wider team.

Technical Customer Support Representative Jun 2018 – Jun 2019

Effadex Investment — Lagos

- Acted as the link between end users and the product development team, translating reported issues into

clear technical specifications.

- Investigated and resolved live platform issues with a 95% first-contact resolution rate, developing a methodical, detail-focused approach to problem-solving under everyday work pressure.

ACHIEVEMENTS

- 2nd Runner-Up, Techstars Startup Weekend Douglas 2026 — conceived and designed whypost, an app enabling users to publish one piece of content simultaneously across multiple social platforms; built and pitched the concept within a 54-hour sprint, placing 2nd runner-up against competing teams from the Isle of Man startup community.

KEY PROJECTS

- OAPP — Marketplace & Payment Platform: designed and built a full-stack platform with secure multi-step checkout and a live Stripe integration handling real payment intents and webhooks; deployed and maintained the production environment on AWS (S3, CloudFront). (arami.vercel.app)
- URHealth — Care Management Dashboard: built a responsive appointment management system with serverless functions, automated notifications and secure, role-based access permissions protecting sensitive personal data. (checkhealth.vercel.app)

EDUCATION

BSc Telecommunication Engineering

Ghana Technology University College, Accra, Ghana — 2012 to 2015

- Relevant coursework: Data Networking, Programming Fundamentals, Signal Processing
- Final year project: designed and built a voice-over-IP communication system using Python

CERTIFICATIONS & CONTINUING PROFESSIONAL DEVELOPMENT

- Oracle Cloud Infrastructure 2025 Certified Foundations Associate — Oracle (Aug 2025)
- Actively building working knowledge of C#, .NET and Microsoft Azure ahead of joining a .NET / Azure environment
- Node.js, Express, MongoDB & More — The Complete Bootcamp 2024, Udemy
- Complete React Developer (Redux, Hooks, GraphQL) — Udemy

ADDITIONAL INFORMATION

- Isle of Man based, immediately available for on-site work in Douglas
- Fast, self-directed learner — proven ability to master new languages, platforms and tools quickly with minimal onboarding
- References available on request
